Centrify Identity Service Mac Edition

Centrify Identity Service, Mac Edition allows you to securely deploy Macs and mobile devices with the same tools you use to manage PCs. It also extends your Active Directory-based management and security to the cloud and includes integrated enterprise mobility management.

Are you a US Federal employee or US Military personnel looking to access protected websites on your personal Mac? [Get Centrify Express for Smart Card.](#)

Reasons to try:

- Enable device choice or BYOD while meeting security policy
- Gain control of unmanaged Macs and mobile devices
- Leverage your existing identity infrastructure, processes and IT staff

Key Capabilities:

- Join Macs to Active Directory
- Provide single sign-on to enterprise applications and services
- Manage Macs and mobile devices via Active Directory Group Policy and/or Cloud-based Policy
- Automate configuration of Wi-Fi and VPN access and PKI issuance and auto-renewal
- Enforce Apple FileVault2 disk encryption
- Remote lock or wipe Macs and mobile devices
- Support Smart card authentication

With the free trial, you'll get access to all features and both community and standard technical support.

"We had a burgeoning – and now growing – Mac population, especially in the executive ranks. Registering MacBooks like mobile devices is a major benefit, and using the Centrify Mac OS client gives us a lot of flexibility because it integrates the Macs into Active Directory."

--Steve Winter, IT Director, Apttus
